GELSER BROTHERS - DALTON, NEW YORK

SIZE OF GLADIOLUS BULBS—We offer Gladiolus bulbs in three sizes.

LARGE size, 1¼ to 2 inches in diameter. The best blooming size. We recommend this size for immediate results.

LARGE bulbs are designated by the letter "L".

MEDIUM size ¾ to 1¼ inches in diameter. This size will give good bloom, but a little later than the large size.

MEDIUM bulbs are designated by the letter "M".

SMALL size ⅜ to ¾ inches. These will make good blooming bulbs for another season, though some will bloom the first year, if planted early.

SMALL bulbs are designated by the letter "S". When there is a figure before the price of a variety, as 2-10c, or 4-10c, it means 2 bulbs for 10c, or 4 bulbs for 10c, etc.

OUR GUARANTEE. We guarantee our stock to be true to name, clean, vigorous and healthy, free from thrips and disease. Should any error occur in labeling or otherwise and any stock shipped eventually prove untrue, we will replace with true stock and you may keep the stock first sent.

TERMS. Full remittance should accompany all orders. However, we will ship C. O. D. on request, when 25 per cent of the amount of the order is paid in advance.

TRANSPORTATION. We pay all delivery charges unless quoted otherwise.

DISCOUNTS. We allow the following cash discounts, when payment is made in full before shipment except on bulbs at wholesale prices.

10 per cent on orders of \$5 to \$25.

15 per cent on orders of \$25 to \$50.

20 per cent on orders of \$50 or more.

BULBLETS—We are offering bulblets of nearly all varieties. It is a cheap way to get started in the high priced varieties, if you will give them the extra care needed. They should be cracked or better still, peel a strip of the hard shell from the side of the bulblet, but be careful not to injure the bulblet in peeling. Bulblets also require plenty of moisture to germinate. We do not guarantee bulblets to grow, so do not expect us to replace any which fail to germinate. We will send you the largest bulblets available, but some varieties never make large bulblets, so if you get bulblets which are small, it will be for the reason that that variety produces small bulblets. We always give extra count when stocks are available. A package of bulblets will contain about 100 bulblets.

We cannot fill orders for bulblets after May 1st.

Gladiolus

INTRODUCTIONS for 1942

Black Diamond (Marocco X Paul Pfitzer)

Very dark red, almost black, heavily ruffled, which intensifies the dark color. This is the darkest gladiolus we have ever grown and we have had nearly all the so-called black ones. Long straight spikes with 5 or 6 good-sized florets open at a time. Produces plenty of bulblets, which grow easily. L \$2.00, M \$1.00, S 50c, 1 blt. 25c, 5 blts. \$1.00.

OUR FORMER INTRODUCTIONS

Alice Reid La France pink, overlaid with geranium pink. Long straight spikes of well placed flowers, which open perfectly to the last one. Very early. Large 2-10c, M 4-10c, S 8-10c, pkg. blts. 10c.

Apache Ground color, orange, heavily overlaid with smoky purple and streaked with very dark purple, almost black. Large yellow blotch in throat. A very odd color combination. Good healthy grower with tall spikes and many good sized flowers open at a time. L 15c, M 10c, S 2-10c, 10-blt. 15c.

Appeal Tall graceful plant with several very large butterfly like flowers open at one time. Color, beautiful shade of geranium pink with conspicuous yellow lip. Rapid propagator. L 2-10c, M 4-10c, pkg. blts. 10c.

Daffodil Prim. Grand. The deepest clear yellow Gladiolus we have ever grown. Tall, straight slender spikes, with plenty of 4½ inch florets open at one time. Winner of several first prizes at the State Shows. Greatly admired by florists. L 2-12c, M 2-10c, S 3-10c.

Empress Rose pink with edges of petals streaked deeper pink. Large, conspicuous greenish yellow blotch in throat. 12 or more large, well placed flowers open at a time with unopened buds all showing color. One spike makes a good bouquet. A good exhibition novelty. L 15c, M 10c, S 2-10c, 25 blts. 15c.

Flor-Rico Rhodamine purple, upper petals and throat light mallow purple. Intensely ruffled and fluted with three to four large flowers of extra heavy substance open at one time. A distinct purple gladiolus. L 2-10c, M 4-10c, S 6-10c, pkg. blts. 10c.

Honey (Prim. Grand) Color, a soft and pleasing buff pink. Especially attractive in artificial light. Four or five well placed, good sized blooms open at one time on long, slender, stiff stems that always come straight. Large bulbs will send up two or three spikes of bloom. Extra good propagator. Early. L 2-10c, M 4-10c, S 8-10c, pkg. blts. 10c.

Mary Frey Lavender pink with ruby blotch on lower petals. Flowers are of large size, perfectly placed on a long, straight, slender stem with six to nine open at one time. Extra early. Winner of Vaughn's Silver Medal for best commercial seedlings. Winner of \$500 Trial Ground Challenge Trophy. L 2-10c, M 4-10c, S 8-10c, pkg. blts. 10c

Orange Beauty Color is orange, sometimes flecked darker, with lighter throat. Growth is very vigorous, 54 inches tall, 17 buds with 5 open florets. The florets are five inches across of good substance and hold up well in hot weather. Straight spikes and good placement. Good propagator. Winner of several awards. L 2-10c, M 3-10c, S 6-10c, pkg. blts. 15c.

Primrose Queen Light primrose yellow without markings. Tall grower with many ruffled flowers open at a time. L 2-10c, M 4-10c, S 8-10c, pkg. blts. 10c.

Red Beacon Color crimson with silky sheen. Good tall spikes with 5 or 6 well placed florets open at once. Heavy texture. Good for cutting. L 20c, M 15c, S 10c, 10 blts. 10c

Red Pirate Tall, healthy plant with 4 to 5 large wide open blooms at a time. Color, dark rose red to carmine, with almost black throat blotch. A very distinct and pleasing shade of red. Good propagator. Large 10c, M 2-10c, S 4-10c.

Redwin Color dark rose red with a large red almost black blotch in the throat. 16 buds with 7 ruffled 5 inch flowers open at one time. A tall healthy grower with very dark green leaves. Splendid propagator. L 50c, M 35c, S 20c. 10 blts. 20c.

Rubio Dark velvety red, streaked darker. 8 to 9 four inch well placed florets open on a tall, straight stem. A very attractive dark red. Large 50c, Medium 30c.

GLADIOLUS THRIP

Gladiolus Thrips have caused great damage to Gladiolus during the blooming season in nearly all parts of the U. S. the past two years.

The Thrip is a very small insect about 1/20 of an inch in length and not easily seen, except when numerous. Thrips do not overwinter outdoors, where the ground freezes. The main source of infection is from planting bulbs infected with the insects. If your gladiolus did not blossom as good as in former years, it may have been due to the Thrip and you should treat your bulbs before planting.

For treating a small number of bulbs, the simplest and most convenient method is by the use of NAPHTHALENE FLAKES. This material intermixed with the bulbs at the rate of 1 oz. to 100 large bulbs, in a paper bag or box gives complete control. After 2 or 3 weeks all insects should be dead. Crushed moth balls can be used if the flakes cannot be obtained.

We believe that all bulbs offered for sale should be treated to eliminate Thrip, as they may be present without being known. We have accordingly treated our bulbs with the best known methods and we can state with confidence, that our bulbs are free from Thrips.
